## Environmental Information on Electricity Products Offered by: Niagara Mohawk Energy Marketing, Inc.

(This is a new energy product. Niagara Mohawk Energy Marketing, Inc., has made no guarantee as to the environmental characteristics of the energy to be supplied from January through December, 2001. The data shown below are default values, and do not necessarily reflect the energy that Niagara Mohawk Energy Marketing, Inc., will supply.)

## Electricity Products offered by Niagara Mohawk Energy Marketing, Inc.

Electricity can be generated in a number of ways with different impacts on the environment. The standardized environmental information shown below allows you to compare this electricty product with electricity products offered by other electric suppliers.

| Default values are shown which represent 1996 | Coal                  | _49_% |
|---|-----------------------|-------|
| regional averages.                            | Gas                   | _7_%  |
|   | Hydroelectric (large) | _2_%  |
|   | Nuclear               | _34_% |
|   | Oil                   | _6_%  |
|   | Renewable energy      |       |
|   |                       |       |

Captured methane gas \_0\_% Fuel cells \_0\_% Geothermal \_0\_% Hydroelectric (small) 0 % Solar 0 % Solid waste 2 % Wind \_0\_%

\_0\_%

Wood or other biomass

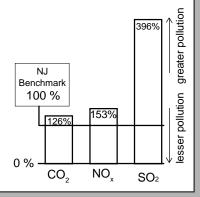

Renewable energy sources subtotal 2% **TOTAL** 100%

## **Air Emissions**

**Energy Source** 

The emission data given are default values and represent the average amount of air pollution associated with the generation of electricity in the region. This amount is compared to the New Jersey benchmark. The benchmark approximates the average emission rate for all electricity generation in New Jersey.

CO<sub>2</sub> is a "greenhouse gas" which may contribute to global climate change. SO<sub>2</sub> and NO<sub>x</sub> react to form acids found in acid rain. NO, also reacts to form ground level ozone, an unhealthful component of "smog."

## **Energy Conservation**

Niagra Mohawk Energy Marketing, Inc., is not investing in energy conservation measures for this electricity product. Energy conservation measures means less electricity needs to be generated and pollution is avoided.

Avoided generation Avoided Air Emissions \_0\_ KWh \_0\_ tons CO<sub>2</sub> \_0\_ tons NO \_0\_ tons SO<sub>2</sub>
